**Subject:** update - Clarke submissions

Hi everyone,

Late today or early tomorrow, we plan to schedule a call with the team and Karen Larson to discuss their initial data submission for the new containers. The CITAB team has completed an initial review and we want to give Clarke feedback on additional information (*e.g.*, bounding) that may be needed to support their proposed data bridging request. This is new territory since bridging is not typically supported for product-specific storage stability data, but the team is thinking creatively about how this might be accomplished.

CITAB also noted that we have not received information demonstrating that the new containers are PFAS-free, which we discussed with Clarke as being important as part of the submission. We will ask what Clarke has submitted to this effect and make sure it is not lagging in the system somewhere.

Please let me know if you would like to be included on the call with Clarke.

Best,  
Catherine
